

The Project

Literacy is not exclusively related to the learner's ability to read and understand a text but it also refers to the learners' ability to understand, interpret, produce and critically position themselves against all kinds of speech and text that are found in the social environment in which they live.

“Supporting Roma Children Integration via Multiliteracies and Multimodality for Language Learning in Early Primary Education”

No. 2020-1-RO01-KA201-080342

What happens at the beginning of the story?

Piloting

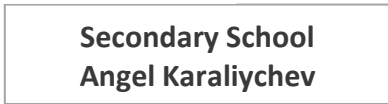

The piloting aims to apply the innovative learning tools via innovative multimodal tools, to assist the children in their collaborative meaning making via Multiliteracies education emphasizing several aspects: potential for pupils' engagement, usability. At Iosif Moldovan Gymnasium School Arad there are 4 didactic scenarios addressed to students from 6 to 12 years old. These scripts will be piloted by our Romanian language teachers, who will apply them to class and include a video, pictures taken from a movie and comics, both with a similar theme.

Learning scenarios

1. Invisible children

This scenario is for children aged 6 and 7 and it includes a video capsule, images taken from the film and comics with similar themes.

The learning situation is built from the video capsule *The Little Match Girl*, adapted from the famous Danish author Hans Christian Andersen, animated short film from 2006, the last capsule type, produced by Walt Disney Animation Studios and released by Walt Disney Pictures, directed by Roger Allers and produced by Don Hahn.

2. *We are all different, but equal at the same time*

This teaching scenario has both as title but also as main topic „We are all different but equal at the same time” and addresses to students between 8 and 9 years old.

The teaching scenario includes a video, pictures taken from a movie and comics, both having a similar topic.

6. Can you understand and identify the thoughts and feelings of the characters using the following pictures?

3. *Let's all be kind!*

This teaching scenario has both as title but also as main topic „ Let's all be kind” and addresses to students between 10 and 11 years old. The teaching scenario includes a video and a story, both having a similar topic.

This topic was chosen because of its easy and understandable structure (in terms of language and form) and also in terms of meanings. The learning situation starts from the video "A life lesson" .

Fill in the following sentences with information from the text!

The dwarfs from the clockshop moved, one by one, into the and in their placedwarfs were put. Nowadays, there are clocks with bows, chains, pendulum or cuckoos, but dwarf or..... can only be seen in fairytale stories.

4. *Metamorphosis*

This teaching scenario addresses 5th and 6th grade students (11- 12 years old). It includes a story, a video and some comic books. More exactly, the video is called „The butterfly” and describes the journey of an insect that turns from a caterpillar to a butterfly, accompanied by animal and human friends.

16. Do you remember the Timeline?

„Timeline” contains Past, Present and Future. The Past shows something that happened and it won't change, Present, is about what happens now, in the moment of speech, whereas the Future shows something that is going to happen

The educational scenario is connected with theoretical proposals that do not consider the textbook as the only learning resource, but they focus on more initiatives taken by the teacher, who is called to use a variety of educational tools: images and animations of television, cinema and computers. These contribute to the achievement of the goals of language teaching by participating in „learning events” providing motivation, producing oral and written speech and developing the language skills of listening, reading and understanding.
